SUMMARY

Highly ambitious Software Engineer with 4+ years of experience specializing in building modern, scalable, and intuitive user interfaces. While my core expertise lies in Frontend development using React.js and Next.js, I possess a strong foundation in Backend processes with my Backend stacks for API and data integrations. Experienced in modernizing legacy systems and bridging frontend systems with reliable data workflows.

WORK EXPERIENCE

Frontend Developer, Mbizmarket.co.id

Sep 2024 - Present

- Led the modernization of legacy PHP modules into Next.js App Router architecture to improve maintainability.
- Architected a backend integration for Odoo inventory using Python to extract and transform procurement data into structured reporting for C-level executives.
- Bridged frontend systems with Odoo-based warehousing data, enabling real-time stock monitoring and distribution tracking across multiple locations.
- Reduced technical debt by refactoring critical system dependencies, leading to improved long-term maintainability and faster deployment cycles.

Frontend Developer, Kamoro Maxima Integra (Placed at PT Bukit Makmur Mandiri Utama)

Oct 2022 - Oct 2024

- Developed scalable internal applications for procurement and pricing using React and TypeScript within a Micro Front-end architecture.
- Digitized SAP MIGO transactions into a modern web interface, significantly improving operational efficiency.
- Built real-time inventory monitoring dashboards and procurement contract management systems.

Frontend Developer, Ajita Digital Agency

Nov 2021 - Nov 2022

- Developed MLDSpot, a high-traffic points redemption platform for Djarum Super MLD, by engineering a secure points-claiming system with transaction code validation and automated receipt upload workflows.
- Developed the official website for the International Nature Loving Association (INLA), focusing on delivering a responsive and high-performing web presence for the global non-profit organization.
- Optimized system maintainability and performance for Retinad by refactoring legacy admin dashboards and client codebases from vanilla JavaScript to Vue.js, while improving data transfer speeds from backend microservices.

TECHNICAL SKILLS

Frontend	React, Next.js, Vue.js, TypeScript, JavaScript, jQuery, Tailwind CSS, SCSS, HTML, CSS
Backend	PHP, Python, Laravel, Phalcon, RESTful API, MySQL, Postgre SQL
Mobile	React Native
Tools & Others	Git, Docker, Azure, Supabase

EDUCATION

Bachelor of Computer Science, Brawijaya University

Aug 2016 - Jul 2021

- Thesis: Developed "Nue Pins" E-Commerce Information System, a web-based platform integrating Midtrans API to facilitate secure and automated payment gateway processing.
- Leadership (BPM HMTI): Served as Chairman of Commission I (Aspirations) for the Information Technology Student Representative Body (BPM).
